

Nature knows best: Welcome to SurFunction, a leading system provider for contactless laser surface functionalization. As a young deep-tech start-up, the company, based in Saarbrücken (Saarland) and Dresden (Saxony), enables new innovation potential and opens up significant competitive advantages for companies from numerous industries worldwide. With its claim "Nature knows best", SurFunction offers the entire range of services from the first feasibility study to technology transfer to finished, highly functional surfaces and systems. Based on its award-winning and patented interference technologies (xDLIP), SurFunction improves its customers' products and processes and contributes to resource conservation. SurFunction cooperates closely with the world's leading research institutes, has first-class references and extensive expertise. The company, founded in 2020, is a spin-off from the Steinbeis research center "Material Engineering Center Saarland" (MECS).

Does that sound like a motivating field of work for you? Then support us at our headquarters in Saarbrücken as a research assistant.

Chemical-technical Assistant (m/f/d)

part-time (mini job – minimum 6 hours)

To support development projects and to strengthen our laboratory area, we are looking for a reinforcement for our team with immediate effect.

Your tasks:

- Planning and implementation of development projects in the field of functional and chemical surfaces
- Monitoring and implementation of coating processes
- Participation in the planning and implementation of measurements on different coatings
- Evaluation and documentation of measurement and coating data
- Participation in quality assurance measures
- Support of product optimization processes

Your profile:

- Finished training as a chemical laboratory assistant, chemical technician, CTA, or B.Sc.
- You are technically/theoretically well versed in various chemistry fields, especially in organic chemistry
- Basic knowledge in biochemistry and biotechnology is an advantage (not a must)
- Project management experience an advantage
- Organizational talent and flexibility, as well as good language skills (German/English) round off your profile

If you are interested in this position and becoming a part of our team, then we look forward to hearing from you via LinkedIn or via email at bewerbung@surfunction.com.
